

KSP GROUPS

POWERING A **GREENER TOMORROW**

LED LIGHTS

Brighter Solutions. Smarter Lighting. **Greener Future.**

High performance LED Lights designed for efficiency, durability and superior brightness. Lighting up spaces. Saving energy. Enhancing lives.

- ENERGY EFFICIENT
- HIGH BRIGHTNESS
- LONG LIFE
- DURABLE & RELIABLE
- LOW HEAT OUTPUT
- ECO FRIENDLY

IDEAL FOR

- RESIDENTIAL
- COMMERCIAL
- INDUSTRIAL
- STREET LIGHTING
- LANDSCAPES
- WAREHOUSES

UPTO 80% ENERGY SAVING

SURGE & VOLTAGE PROTECTION

FLICKER FREE LIGHTING

EASY INSTALLATION

WIDE RANGE FOR EVERY NEED

QUALITY YOU CAN TRUST

KSP GROUP – LIGHTING SPACES. ENRICHING LIVES.

BRIGHTER TODAY.
BETTER TOMORROW.
BUILT ON TRUST.

LED Lighting Poles

About us

LED lighting poles are an essential part of modern outdoor infrastructure, designed to provide strong illumination, energy efficiency, durability, and enhanced safety for streets, highways, parking areas, gardens, industrial zones, campuses, and public spaces. Combining advanced LED lighting technology with robust pole structures, these systems offer long-lasting performance while reducing electricity consumption and maintenance costs.

Our LED lighting poles are manufactured using high-quality materials such as galvanized steel, aluminium, and powder-coated finishes to ensure superior strength and resistance against corrosion, harsh weather conditions, and environmental damage. Engineered with precision and innovation, these poles support a wide range of lighting applications including smart city projects, urban roads, residential communities, commercial complexes, stadiums, and decorative landscapes.

We focus on delivering reliable, eco-friendly, and aesthetically designed lighting solutions that improve visibility and security while contributing to sustainable development. With advanced manufacturing techniques, strict quality standards, and customizable designs, our LED lighting poles meet the evolving requirements of modern infrastructure projects.

Our mission is to provide durable and energy-efficient lighting systems that combine performance, safety, and style. From compact garden poles to high-mast street lighting poles, we ensure every product delivers maximum efficiency, longer service life, and minimal operational costs. Customer satisfaction, innovation, and quality remain the foundation of our commitment to excellence.

The unbeatable Advantages

- Energy-efficient lighting with lower power consumption
- Long lifespan compared to traditional lighting systems
- Reduced maintenance and replacement costs
- Excellent brightness and visibility during night hours
- Environment-friendly and low carbon emissions
- Weather-resistant and corrosion-resistant structure
- Suitable for highways, streets, parking areas, and public spaces
- Provides enhanced road safety and security
- Instant lighting without warm-up time

- Available in various heights and attractive designs
- Strong and durable construction for long-term use
- Supports smart lighting and automation systems
- Better heat management and stable performance
- Cost-effective solution for urban and industrial lighting projects
- Uniform light distribution with minimal glare

Features :

- High-quality galvanized steel or aluminium pole construction
- Powder-coated finish for extra durability and attractive appearance
- High-efficiency LED luminaires with superior illumination
- Rust-proof and waterproof design
- Available in single-arm and double-arm configurations
- Customizable height, shape, and mounting options
- Low energy consumption with high lumen output
- Easy installation and low maintenance design
- Designed to withstand heavy wind and harsh climate conditions
- UV-resistant and corrosion-resistant materials
- Compatible with solar and smart lighting systems
- Strong foundation support for stability and safety
- Modern and aesthetic pole designs for urban landscapes
- Reliable performance with long operational life
- Suitable for commercial, residential, industrial, and municipal applications
