

KSP GROUPS

POWERING A **GREENER TOMORROW**

PANEL BOARDS

Reliable Control. Safe Operations. **Maximum Efficiency.**

High performance Panel Boards designed for safety, efficiency and long-lasting operations. Engineered to power your world with reliability.

- SAFE & RELIABLE
- EASY OPERATION
- EFFICIENT PERFORMANCE
- DURABLE CONSTRUCTION
- LOW MAINTENANCE

IDEAL FOR

- RESIDENTIAL
- COMMERCIAL BUILDINGS
- INDUSTRIAL APPLICATIONS
- PUMPS & MOTORS
- POWER DISTRIBUTION

SAFE POWER.
SMART CONTROL.
STRONGER FUTURE.

- OVERLOAD PROTECTION
- SHORT CIRCUIT PROTECTION
- VOLTAGE MONITORING
- COMPACT & SPACE SAVING
- QUALITY ASSURED

KSP GROUP – DELIVERING POWER. ENSURING SAFETY.

Panel Boards

About Us

At Electrical Engineering Panel Boards division, we specialize in designing, manufacturing, and supplying high-quality electrical panel boards that ensure safe, efficient, and reliable power distribution for residential, commercial, industrial, and infrastructure applications. Our products are built using advanced technology, premium-grade materials, and strict quality standards to deliver excellent electrical performance and long-lasting durability.

We focus on providing customized solutions that meet the unique power requirements of different industries. From main distribution panels and control panels to motor control centres and switchgear assemblies, our panel boards are engineered for maximum safety, easy operation, and energy efficiency. With a skilled technical team and customer-focused approach, we are committed to delivering products that comply with industry standards and provide dependable performance even in demanding environments.

Our mission is to offer innovative and cost-effective electrical solutions that improve operational efficiency while maintaining the highest standards of safety and reliability. Through continuous improvement, modern manufacturing techniques, and dedicated customer support, we aim to become a trusted partner in the electrical and power distribution sector.

The unbeatable Advantages

- Provides safe and organized electrical power distribution
- Protects electrical systems from overloads and short circuits
- Ensures smooth and efficient operation of electrical equipment
- Reduces power loss and improves energy efficiency
- Supports easy monitoring and control of electrical circuits
- Suitable for residential, commercial, and industrial applications
- Offers long service life with durable construction
- Minimizes maintenance requirements and downtime
- Enhances operational safety for users and equipment
- Can be customized according to power requirements and applications
- Helps in better load management and system reliability
- Compact design saves installation space

Features :

- High-quality metal enclosure with strong durability
 - Shockproof and corrosion-resistant body design
 - Easy installation and user-friendly operation
 - Advanced circuit protection mechanisms
 - Efficient heat dissipation for stable performance
 - Modular design for flexible expansion and maintenance
 - Equipped with premium switches, breakers, and busbars
 - Neat internal wiring for better safety and organization
 - Low power consumption and energy-efficient performance
 - Available in different sizes and capacities
 - Designed according to industrial safety standards
 - Reliable performance under varying load conditions
 - Supports automatic and manual control systems
 - Weather-resistant options available for outdoor use
